**BUILDING PRODUCTS**

Specialists in Supply Solutions

**QUALITY &  
SERVICE  
WHERE IT  
MATTERS**

As specialist importers, manufacturers and technical distributors, EBP Building Products Ltd has over eight decades of expertise & skill when it comes to supplying Building, Drainage and Roofing products to the builders merchant industry.

Established in 1929, our company have been specialist suppliers to the builders merchant industry for almost 90 years.

Our broad range of commodity Building, Drainage & Roofing products and flexible service offer, backed up by expert support, maximises both cost & efficiency for our clients and makes us a more competitive partner for their business.

Instead of spending time looking for the right products from a myriad of suppliers, working with EBP Building Products enables our clients to spend more time focused on their business and their customers. Clients can order the quantities they require rather than the quantities other manufacturers and suppliers want to sell them, keeping their business lean & mean.

In addition, we specialise in a technical range of Drainage, Roofing & Building Products where we offer tailored supply solutions, technical advice, site visits and product training where needed.

More detailed information on our products & services is available from our web site at:

[www.ebpbuilding.com](http://www.ebpbuilding.com) 

As well as delivering the length and breadth of the UK & Ireland, drive-in collection is also available from our purpose-built warehouse and trade counter facility located just 200 metres from junction 5 off the M65.

## Commodity Building, Roofing & Drainage Products

### Breathable Roofing Underlay Membranes

EBP Ventia™ Breathable Roofing Underlay Membranes combine high performance together with BBA certification and are suitable for use in accordance with the latest wind uplift resistance requirements of BS 5534:2014.

### Polythene Building Films and DPC

The EBP range of standard and specialist polythene building films including BBA certified damp proof membranes, gas and vapour barriers, DPC, pallet wrap, rubble & refuse sacks as well as a range of accessories including top hats and jointing tapes.

### Manhole Covers & Gratings

Manufactured from steel, grey iron, ductile iron and GRP/composite material our standard off-the-shelf range is comprehensive. "Specials are our specialty". We also offer a design and quotation service for non-standard & fabricated items.

### Manhole Lid Removal Kits

Our Universal Manhole Key Kits comprise 2 lifting handles 440mm long with quick release ends, 14 interchangeable tips and full set of instructions c/w a handy carrying case. As seen on Dragon's Den, components are made from carbon steel for strength and zinc plated for protection. Our Universal Manhole Seal Breaker & Lifting Key Kits include a bottle jack and heavy duty pivot bar for easy mechanical breaking of manhole seals and safe removal of lids.

### Eco-Parking™

Our own branded Grass Grid Paver system, manufactured in the UK from 100% recycled material and which creates a low maintenance, permeable drainage solution for driveways and parking areas for vehicles up to 20 tonnes axle loading as standard.

### Utility Meter Boxes

Gas meter boxes to BS8499 and electricity meter boxes to BS8567, our meter boxes are approved and installed by all major utility companies and house builders.

### Drywall Joint Tapes & Repair Fabric

Self-adhesive and manufactured from fiberglass mesh, EBP Tape™ and EBP Wall & Ceiling Repair Fabric are easy to use and greatly enhances strength & durability of any wall joint or repair.

### Domestic Channel Drainage

Available in either polymer concrete, polypropylene or glass reinforced polyester (GRP), together with a range of accessories and grating options to suit all design requirements. EBP DECK-A-DRAIN™ Mini Profile Channel is specifically designed for patio, drive & decking areas and provides a more aesthetically discreet option to traditional channel drains.

### Torch-On Flat Roofing Membranes

High quality and performance bituminous membranes for use in residential and commercial flat roof waterproofing applications. Our range includes modified distilled bitumen membranes with plastomeric (APP) and elastomeric (SBS) polymers. Available in a range of weights, surface finishes & colours.

### Hessian Frost Protection & Sandbags

Used to cover newly laid concrete & brickwork to protect from frost. Our biodegradable hessian can be used in gardens to protect shrubs and plants from frost root damage; also helps with soil erosion and moisture retention in hot weather. In addition we supply hessian and polypropylene sandbags for flood protection.

## Technical Products

### Firestone EPDM Rubber Flat Roofing Membranes

The demand for Firestone EPDM Single-ply Flat Roofing Membranes is gathering momentum. Currently accounting for upwards of 15% of flat roofing membranes installed on residential projects, Firestone EPDM Single-ply membranes are set to continue making serious inroads into the traditional bitumen based flat roofing membrane market.

As a merchant supplier and Firestone authorized importer & distributor, the only Firestone authorized national distributor based in Northern England, EBP Building Products make it easy for merchants to get involved and establish their place in the supply chain. No need to stock to begin with, we offer product & installation training, technical assistance and point of sale material. In return for your support will work with your branches/members to help generate sales leads.

### Natural Roofing Slates

EBP Building Products have been specialist suppliers of natural slates since 1929 and our Sobrano™ branded range of imported natural roofing slates are well respected. All our Spanish slates are A1, T1, S1 rated; our Chinese slates are A1 & T1 rated with Sulphur Dioxide ratings of between S1 and S3. CE marking is standard, the wide range of sizes and slate & halves available from stock, together with a like-for-like price match guarantee.

Drawing on our experience & expertise over the past thirty years we have sought to source Spanish slates with the highest possible ratings at an economic price. The result is that our 'off-the-shelf' Spanish slate is a 'catch-all' product combining highest quality with affordable price. We are geared up to supply full loads, half loads or single crates; we are also happy to price any specific requirements on a job-to-job basis.

### Flat Roof Edge Trims

EBP Ultra Trim™ Flat Roof Edge Trims are better by design and are used on flat roof installations in conjunction with single-ply flat roofing membranes. Being a 2-part mechanical fix ensures a more secure and straightforward installation even when factory seams in the membrane are present.

### Surface Water Drainage Systems

Channel profiles are available in a range of depths & widths, with or without built-in fall, with or without protected edge, to suit virtually any application. Gratings options include galvanised steel, ductile iron, stainless steel, composite, slotted, perforated, ornate, solid topped, top slot and in loading classes from A15, B125, C250, D400 & F900 off-the-shelf. Our technical sales team can offer advice on design criteria including traffic loading, flow rates, specification

and quotations in order to determine the right product for the job and at the right price; all of which is intended to give our customers the edge when quoting their clients requirements. On-site surveys and channel drainage health-check inspections are also available.

### Bespoke Manhole & Access Covers

We offer a design & quotation service for non-standard and fabricated manhole and access covers. Can be manufactured from a wide range of materials including cast & ductile iron, galvanised & stainless steel or composite and to any loading or a specific pattern.

### Decorative & Art Design Channel Gratings

Exclusive stylish designs & patterns designed for internal and external use on residential, commercial and urban schemes. Manufactured from cast iron, stainless steel or composite stone.

### Colour Matched Gratings Service

Polyester powder coloured coating matched to any RAL colour. Hard wearing and UV resistant, polyester powder coating is especially designed for outdoor use. More cost effective than brass or stainless steel.

### Utility Drainage & Water Attenuation

Includes a range of modular structural inspection & access chambers for underground installation, ideal for all ducted network applications. Manufactured from recycled polypropylene and able to withstand load bearing strengths of up to 90 tonnes. AquaCrate water attenuation & infiltration crates help prevent flooding and can be used for greywater storage.

### Soil Stabilisation and Ground Improvement

We offer a comprehensive range of ground reinforcement products including mats & grids, suitable for grass & gravel infill and specifically designed to allow water to drain effectively and prevent areas becoming waterlogged. Ideal for car parks, pedestrian areas and access roads and can withstand compressive strengths of up to 300 tonnes unfilled.

### Cavity Wall Protection System

<https://www.youtube.com/watch?v=ZD-FNzzgJe8>  
Using Cav-Form™ Cavity Wall Protection System will save you time and money on cavity wall construction. In addition it reduces the risk of compromising the performance and effectiveness of cavity walls caused by mortar debris & moisture penetration during construction. It helps builders achieve the robustdetails® recommendations for improved site practice in respect of Separating Wall – Cavity Masonry.
